

2020-10-07 ENT - appt notes_hearing center Covington

Ear Compaction Notes:

R

Non occluding

Cerumen unremarkable in AD (right)

Unremarkable AS (left)

- So after just >3 months my right ear is definitely showing significant wax buildup.
- Enough for the phd student // tech to mention checking before the audiology testing. Was init.
- So, note this for future ear compaction with the Audiologist at UMC and with my ENT.

Testing Sheet Notes:

Green area normal heading range on test.

- My hearing fell well within the “normal” range.
- The testing ranges were offset by 5db differences.
- She explained the “hearing banana” and its use within hearing sounds to make words.
- How those with significant hearing loss:
 - o Will not be “able to understand”.

- Will still be able to “hear”.
