

CORONA-VIRUS PANDEMIC HEARING AID STIMULUS PACKAGE ANNOUNCED FOR LOUISIANA

Received 2020-09-29

A HEARING AID STIMULUS package for Louisiana residents has been announced and will go into effect immediately. National Government statistics have revealed that over one million individuals over 60 in Louisiana have a loss of hearing that affects their quality of life. **According to Johns Hopkins University School of Medicine, even a mild loss of hearing doubles the risk of dementia.**

This **HEARING AID STIMULUS** will be initially offered through selected hearing aid dispensing practices serving Louisiana counties. Louisiana residents will receive a \$1,000 voucher that can be used toward the purchase of (2) advanced digital technology hearing aids (\$500 per hearing aid). This **HEARING AID STIMULUS** is not part of a government sponsored benefit or bailout, and does **NOT** have to be repaid.

The selected practices have also agreed to provide complimentary hearing health screenings at no charge, and additional hearing exams necessary to determine an individual's need for hearing correction. Please be advised that all testing and counseling will be conducted by Hearing Aid Specialists. In addition, this **HEARING AID STIMULUS** will provide each individual with a 30-day exchange privilege on all hearing aid technology. Those individuals who currently have older hearing aid technology will be given a trade-in value of those instruments off of current manufacturer's suggested hearing aid pricing. Call the number below to set an appointment immediately as this **HEARING AID STIMULUS** voucher is limited to those receiving this notification. Our operators are standing by so please phone today to determine if you qualify for this special voucher.

Learn the Truth about ^{Received} **MILD HEARING LOSS &** 2020-09-29 **ALZHEIMER'S DISEASE!**

People with a severe hearing loss are 5 times more likely to develop dementia than people with normal hearing. According to Johns Hopkins University School of Medicine.

If all too often, your answer to your spouse is, **"Sorry honey, but I can't understand what you are saying when the TV is on"**. You have a serious impairment that needs immediate attention. When your sense of hearing grows dim, your mind grows dim, it's that simple.

According to Johns Hopkins University School of Medicine there is a definite link between your mild hearing loss, loss of memory, and Alzheimer's Disease!

Use the enclosed Voucher and make an appointment today!
