10:10 am

- My first message. In response to friend.
- Was laying in bed having just woken up.
- Had not yet taken medication.
- Adderall 40 mg (1st dosage)
- Taken at 10:35 am~
- Starts working at 11:15 am~

10:25 am

- 2nd msg. In reponse to friend.
- Still remember this did not yet have seizure symptoms.

10:42 am

- Sent this message while having seizure symptoms.

- Right before quickly sitting down on toilet.

- Having not yet gone to bathroom. Felt like had to go. So, stopped preparing breakfast to go to bathroom.

- Basically sent this right as walking rushing to bathroom.

- Realizing having smaller seizure symptoms.

- Note:

- Temp downstairs was 60 deg to 70 deg.

- Was significantly shivering while going downstairs.

- Unsure if effects seizure symptoms.

- Seizures increase with frequency in winter. And, with shivering. As my perception of it.
