cosmos whitepaper

cyberlink is two linked links. Call one - get another

- dot-cyber
- gravity
- js-cyber
- cyb
- ~~js cosmos~~
- ~~cyb virus~~

# dot-cyber

- slow dht bypass
- burner wallet (delegation)
- complex queries (KGI)
- snippets
  
- embedded ipfs node
- governance
- some social (KGI)
- file explorer
- realtime
- faucets (auctions in mainnet)

# gravity

- dot-cyber components
- basic snippets
- docs

# js-cyber

<https://cybercongress.ai/docs/cyberd/rpc/>

<https://cybercongress.ai/docs/cyberd/lcd/>

# cyb

- make PoC work
- make dot-cyber works inside with dura
- move cyb-virus codebase
- long ongoing research

# cyb

Browser is execution env

Fundamental problem:

Must not stuck!

- Resource permissions
- Data permissions
- Phishing protection

robot transformer
