

Invitae Melanoma Panel
Order ID: RQ1524108

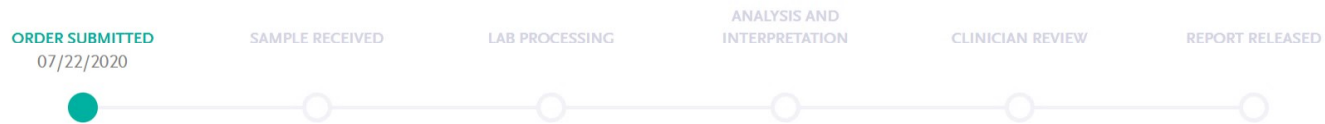

TEST TYPE
Diagnostic

PHYSICIAN
Brian Boulmay

ORDER DATE
07/22/2020

TEST STATUS GENES ANALYZED DOCUMENTS

Your doctor has ordered a genetic test.

Your doctor has ordered a genetic test for you based on your personal and family health history. In this test, your DNA will be sequenced to identify changes in your genes (specific sections of your DNA) known to either cause or increase your risk of developing a specific, genetic condition. To see the list of genes analyzed by this test, click the "Genes Analyzed" tab.

What's next?

Provide a blood or saliva sample and send it to Invitae's laboratory. The cells in your sample contain complete copies of your DNA.
