

# Saving Token

# **Saving**

## **A digital alternative**

**For years cryptocurrencies have been booming in the digital asset markets and as an alternative to use the paper or currency that we know, this can be seen thanks to the fact that more and more projects are born trying to have an economic form and base in a currency digital.**

**Projects ranging from simplifying a payment to those seeking advanced technological solutions.**

**The Saving Project endeavors to go on the part of simplifying any economic lifestyle in society.**

**The Saving Project goes back to the idea of having a digital medium to make payments, transactions, save, seeking to be useful for any type of service project, facilitating efficient, fast and reliable use.**

**In addition, the use of our tokens on defi, nft, and other blockchain platforms, which give you the ease of having a financial project where you can generate profits.**

**With this we seek that Saving is adopted for any economic or service project, for example going to the supermarket to make the purchase and simply pay with saving, closing a business remotely or in person, making a transfer with**

**saving quickly and safely, receiving payments with saving before any service you provide, saving for your vacations in an intelligent and digital way, and then covering expenses with saving, opening an online store and being able to receive payments with saving, all this and more can be achieved with this digital token project.**

**Do you have a project in mind? In the commercial and economic part, saving can be a good ally.**

#### **\*STRUCTURE**

**Our tokens are registered in 3 different blockchains. The tokens and blockchains in which they were created are: Svin in the Tron network (trx), Svit in the Expanse network and Svik in the Kron network, with this we seek to have three options taking advantage of characteristics that each one can offer us and thus make it available to all.**

#### **\* SOCIAL**

**Saving plans to do social good, bringing humanitarian aid to places of need, thinking mainly of children and the elderly.**

#### **\*COMMERCE**

**The token trade (svin, svit and svik) will be in the liquidity pool, Exchange, farming platforms and nft.**

## **\* NETWORKS OR MEDIA**

**Saving currently has an official website, a telegram channel, a discord channel, a Facebook page.**

## **\*Epilogue**

**This document is created so that you know the fundamental ideas of the Saving project. We invite more people to be part of us.**
