FLUXON

1. What is Fluxon?

Deflationary by Design

Fluxon (\$FLX) is a next-generation deflationary reward token deployed on the Polygon Network. It is engineered to grow its own liquidity, reduce supply over time, and reward holders automatically through a self-sustaining economic model.

Total Supply

50,000,000 FLX (Fixed Forever). No mint function. No supply expansion.

Core Principles

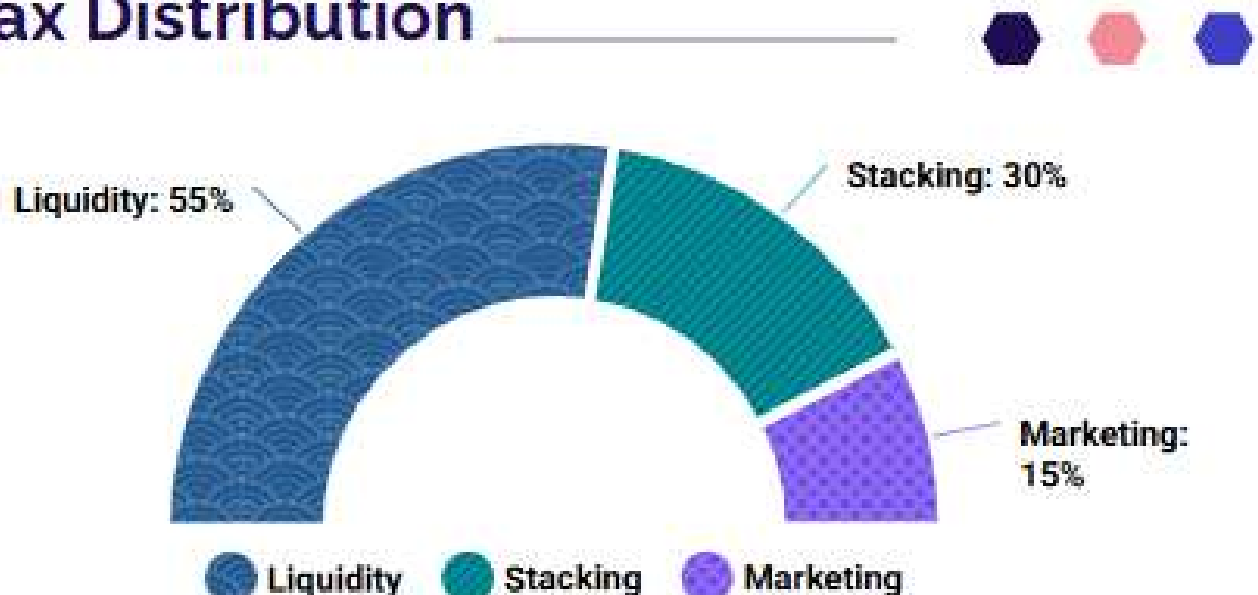

Fluxon's NFT ecosystem enhances staking rewards and reduces buy/sell taxes for holders. Each NFT also functions as an identity asset within the Fluxon ecosystem.

2. Transaction Fees

3. Tax Distribution

Distribution Model

This structure ensures permanent liquidity growth, continuous staking rewards, and a marketing wallet that never dumps the token, leading to long-term sustainability without sell pressure.

4. NFT Utility

NFT Ecosystem Overview

Tier	Supply	Mint Price	Staking Boost	Tax Reduction
Common	300	50 MATIC	1.10x	0%
Rare	150	80 MATIC	1.30x	2%
Legendary	50	200 MATIC	1.50x	4%

5. Staking

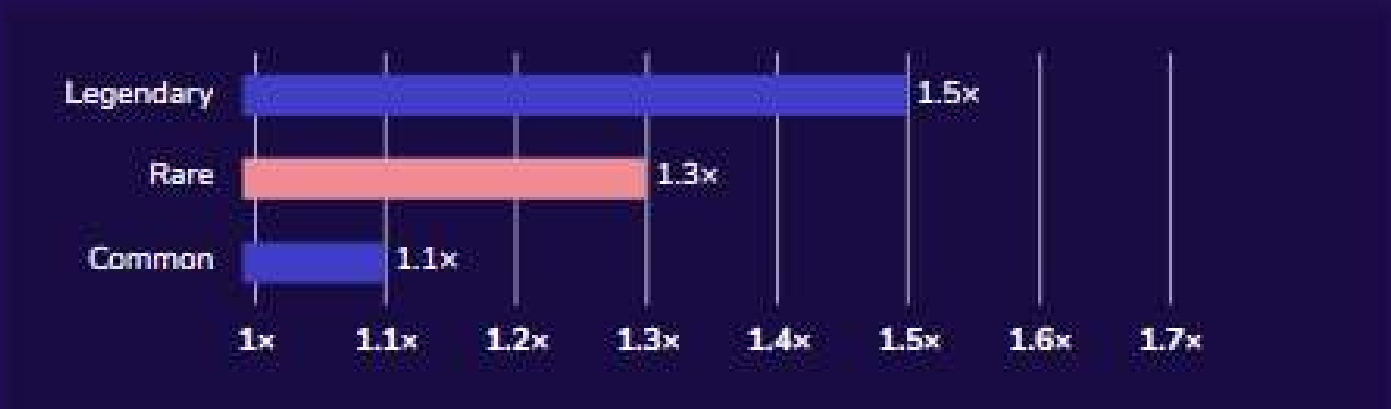

Staking (Live 10 Days After Launch)

Fluxon's staking protocol is powered directly by ecosystem taxes.

Reward Sources

- 30% of every buy/sell tax → FLX rewards
- 10,000,000 FLX pre-loaded at launch

NFT Boosts

Tokenomics

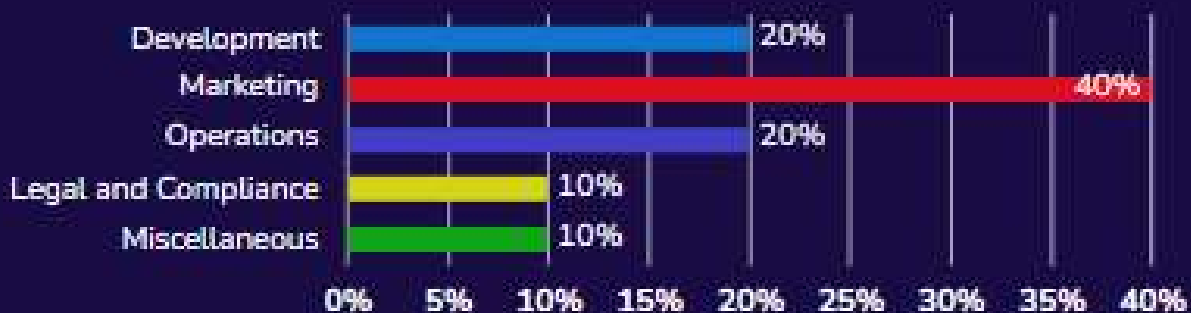

FLUXON

Name	FLuxon
Symbol	FLX
Total Supply	50,000,000 FLX

Distribution Plan

Use of Funds

6. Anti-Bot Launch Protection

• Anti-Bot Launch Protection

Fluxon uses a battle-tested anti-snipe model to prevent MEV, bots, and sniper attacks.

Protection Stages

1. First ~45 seconds

- 99% tax
- 0.15% max transaction size
- Zero human or bot sniping

2. Next ~90 minutes

- Tax decreases gradually until normal rates
- Smooth, organic launch curve

This ensures a clean, fair, community-first launch.

7. Security & Transparency

Security Highlights

Pause Protection

All transfers blockable during emergencies.

Liquidity Locked

365 days minimum.

Team Vesting

10,000,000 FLX vested over 365 days, linear unlock.

FLUXON

Security & Transparency (cont.)

No Mint Function

The contract has no function to mint new tokens, ensuring a fixed total supply forever.

No Hidden Fees

Our smart contract is fully auditable with no hidden mechanisms or fees to ensure complete transparency.

Conclusion

Fluxon is built for stability, sustainable rewards, and real utility — not temporary hype. Its ecosystem combines deflation, automated liquidity growth, staking yield, and NFT utility into a unified, future-proof system.
